

MONTREAL TRAMWAYS 3500

TP85

The first in a lot of 18 PCC's built by Canadian Car & Foundry in 1942. These were the only PCC's to run in the Province of Quebec. For some reason these cars did not catch on. The motormen preferred the older conventional cars. These cars ended their service August 20, 1959. 3500 is photographed at McGill & St. Jacques downtown Montreal, Que., May 21, 1955.
